INTRODUCTION

Welcome to Activstudio 3

We've been listening to what teachers want and have distilled that feedback into the latest version of Activstudio. In this booklet we will introduce you to some of the most important new features of the software.

In brief

We've enhanced the software, so Activstudio is even better for teaching at an interactive whiteboard.

We've made designing lessons simpler, whilst significantly increasing the opportunities for creativity.

We've improved the training we offer you.

...all working together to help improve your students' learning.

THE DASHBOARD: THE LAUNCHPAD FOR YOUR TEACHING

Activstudio 3 comes equipped with a whole new launchpad for your teaching: the dashboard. The dashboard helps you to organise your teaching and offers the starting point where you can really learn how to make the most of Activstudio and your interactive whiteboard.

Some of the dashboard's most important sections:

Training

Visit this page to find the training method of your choice.

Choose from:

Online courses

Manuals

Face-to-face training

Promethean Planet

Register for free on Promethean Planet to join the Promethean community and share resources, flipcharts and ideas with other teachers

The screenshot shows the Promethean Planet website dashboard. At the top, a navigation bar includes links for 'New/Open', 'Configure', 'Online' (which is highlighted), 'Training', and 'Support'. Below this, the main header area features the 'PROMETHEAN PLANET' logo and a welcome message: 'Welcome to Activstudio 3 by Promethean. If you use an interactive whiteboard or electronic voting system, Promethean Planet is for you. It's a FREE, online community designed with one goal - supporting teachers. [Learn more >](#)'. The dashboard is divided into two main columns. The left column, titled 'USEFUL LINKS', contains four items: 'The Digital Chalkface' (a global collection of stories, reports and papers reflecting good practice and research using Interactive Whiteboard and associated peripherals in the classroom), 'Planet News' (Features information about special people, places and opportunities. With thousands of Activclassroom teachers throughout the country, there's bound to be plenty to share), 'Tips from the Pros' (A little extra help goes a long way. Our TLAs are ready and waiting to provide the assistance you need to make your Activclassroom more efficient and effective), and 'Forum' (The user forum is designed to serve as a gathering place for Activclassroom users to share experiences, learn from colleagues). The right column, titled 'FEATURED RESOURCES', contains three items: 'Example Pages' (There are countless ways to get the most out of your lessons and numerous techniques as a means of demonstrating concepts), 'Who wants to be a Gazillionaire?' (Here's a brilliant blank flipchart template for "Who wants to be a millionaire?". Add your own text and alternative answers), and 'Blockbusters Template' (This single page flipchart template enables you to set up a two team game of Blockbusters). Below these resources are two links: '> More featured resources' and '> Search resources'. At the bottom of the dashboard, there is a copyright notice: '©Promethean Ltd 2007' and a small logo of a person running.

Support

Check here for software updates.

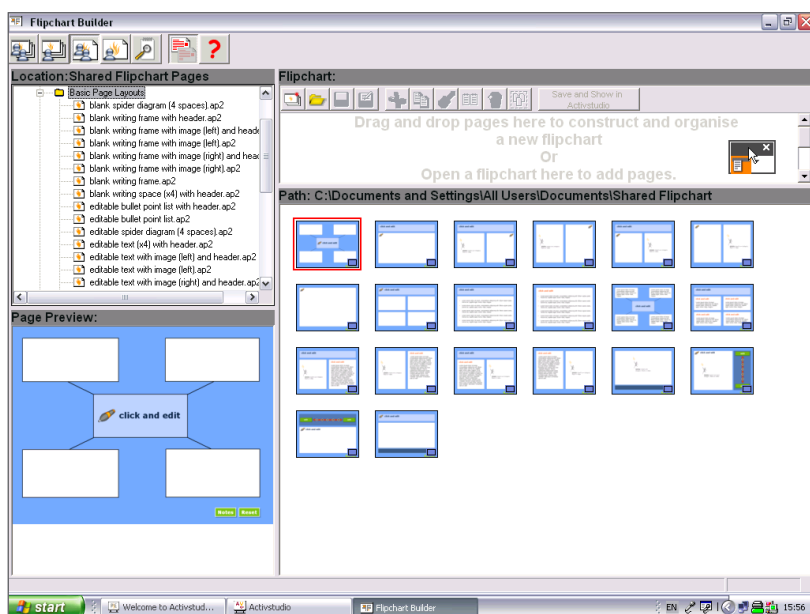

LESSON CREATION IS QUICKER

Teachers have asked us to create templates to help with lesson design. These templates are now instantly available by clicking on Flipchart Builder in the dashboard.

Flipchart builder and flipchart templates

More flipchart templates will be available to download from www.prometheanplanet.com.

DESIGNING FLIPCHARTS IS SIMPLER

We have created Design Mode and Presentation Mode. Use Design Mode to create flipcharts. Use Presentation Mode's teaching layout when working at an interactive whiteboard, keeping the most important tools within easy reach.

Design Mode and Presentation Mode

Design Mode

Presentation Mode

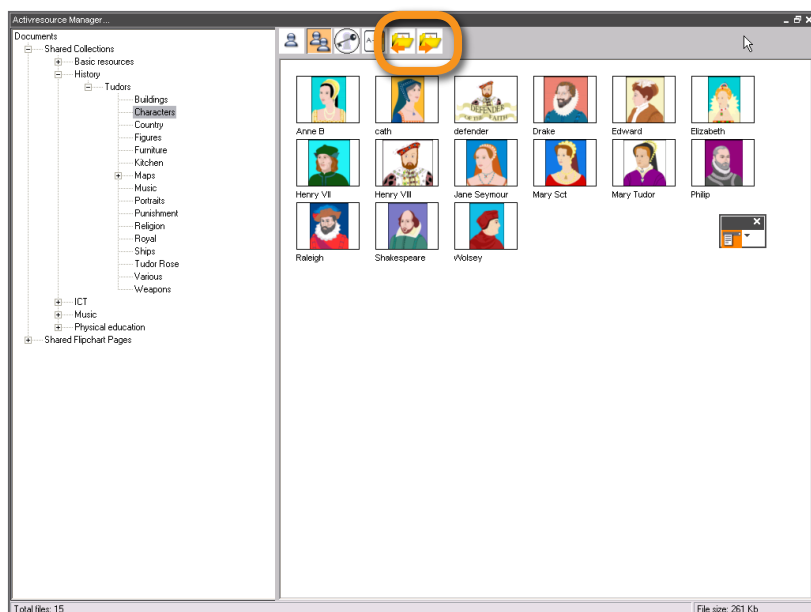

IMPORT AND EXPORT RESOURCES

Visit the Activresource Manager for options which let you import and export resources.

Download themed Pack and Go resources from Promethean Planet.

Pack a set of resources you have created so they can be shared easily with colleagues.

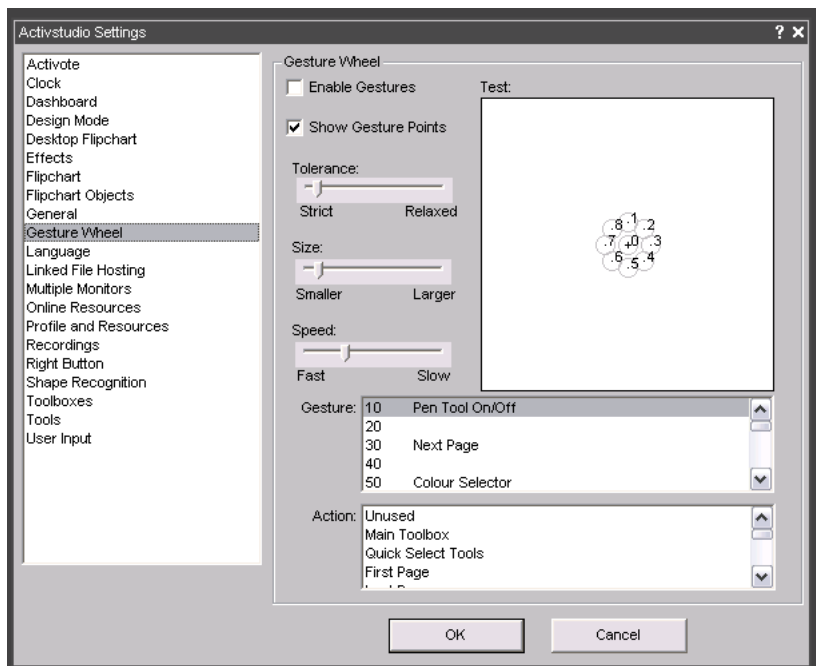

FOCUS ON TEACHING

Exclusive to Activstudio and Activprimary software: now you just have to wave your Activpen to make what you want happen.

Gesture technology

You can turn the page, switch on your favourite tool or even save your document without having to click on any icons. In this way you can simplify the software so that it does exactly what you want.

INTERACTIVE FLASH RESOURCES

Visit the Shared Activities section of the Resource Library for some interactive Flash resources to help when working with numbers and words.

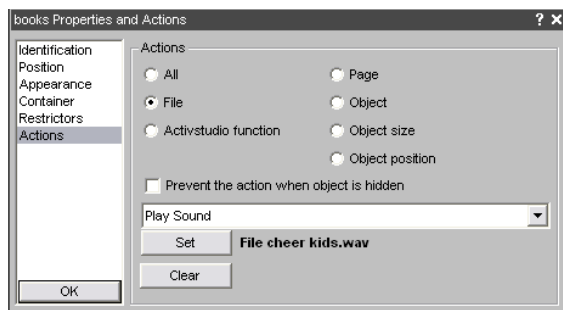

COOL NEW FEATURES FOR DEVELOPERS

Advanced users of Activstudio have been clamouring for yet more features to give them further creativity when creating lessons. The new options in the Properties and Actions box offer over 200 new actions and other settings for you to explore!

The Properties and Actions box

To find the Properties and Actions box double-click on an item on your page and select the Properties icon from the Object Edit toolbox.

EXTRA TOOLS IN THE TOOL STORE

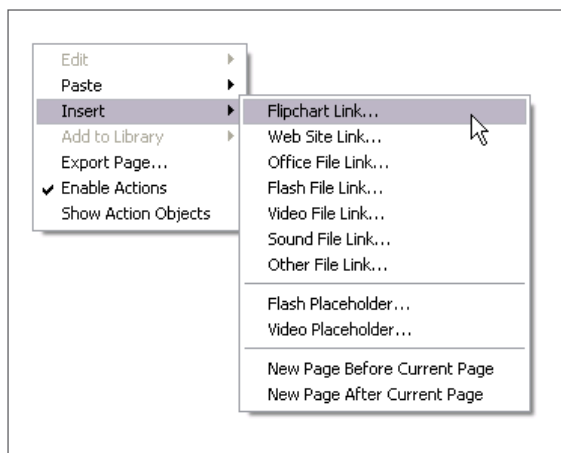

Previously, some of Activstudio's most popular icons, such as the Straight Line tool and the My Images icon, were not available in the Tool Store. Now you can add these icons, and many others, to any toolbox of your choice.

Explore the Tool Store.

INSERTING LINKS IS EASIER

Using multimedia such as Flash files and videos is a fundamental part of Activstudio. Now, inserting links to a range of file types is easier. Explore the options here, also, to place the videos and Flash files directly in the flipcharts.

WORKING WITH TEXTS HAS BEEN STREAMLINED

Instant typing

Now to type on the flipchart just click where you want to put the text and start typing.

Text editing

To edit text:

Click once on the text to select it.

Click on the text again to begin editing.

Text format painter

If you like the look of a text on the page you can now copy the text's formatting to other texts.

To do this:

Select the Colour Picker tool.

Press Ctrl on your keyboard and, at the same time, click on the text to copy its formatting.

Select the Fill tool.

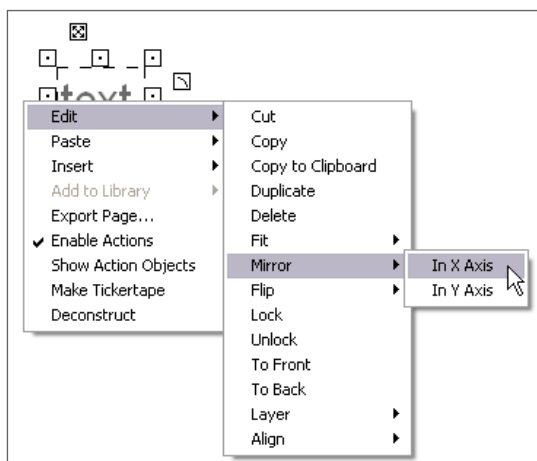

Press Ctrl on your keyboard and, at the same time, click on any text you want to change to the copied style.

Instant colour change

Select a text and now you can change its colour using the Main toolbox's colour palette.

Reflect your texts

Right-click options now let you reflect your texts.

MORE OPTIONS WHEN WORKING WITH IMAGES

Pick-up boxes

A small but important demonstration of how we respond to teachers' feedback. We've moved two of the software's pick-up boxes so that they are easier to select on an interactive whiteboard.

You can change the size of the pick-up boxes in the Flipchart Objects section of the Activprimary Settings box.

Pick-up boxes are now also available on Flash objects.

Instant grouping

We've created an icon to make grouping easier. Select two or more objects and the grouping icon will appear with the other pick-up boxes. Click on this icon and your items will be grouped. Click on it again to ungroup your icons.

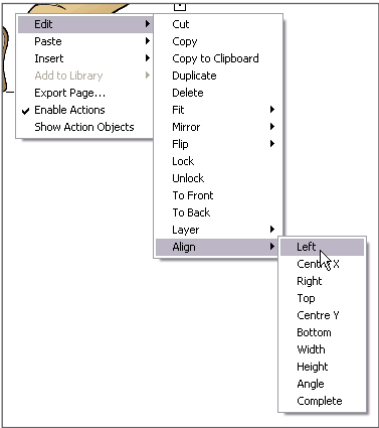

Marquees

When an item is selected it is surrounded by a rectangle.

Aligning images

Creating neat pages is easier with the help of these new right-click options. Using these options, you can select a number of options and line them up instantly

REFINED TOOLS

Flipchart Bin

Just click on an item then click on the Flipchart Bin to delete the item from the page.

Show/Hide Resource Tree

We've placed this icon lower down on the Resource Library so it is easier to click whilst at an interactive whiteboard.

Camera tool

Now you perform keyboard nudges when using the Camera tool. Click on the arrows on your keyboard to help you define the area you want to snapshot.

NEW ICONS

Feedback from teachers has told us that icons at the top of the board are sometimes too high for them to reach.

Until now, four important icons were located up here. Now they've been set free and given a new look. You can find them in the Tool Store so you can add them to any toolbox of your choice:

Page Notes

Page Scale

Arrange Windows

Enable Actions

Object Edit toolbox – new icons

A transparency slider has been added to the Object Edit toolbox, letting you make your images more or less translucent. Two new buttons let you arrange your images, sending them to the back or front of a group of images. Double-click on any item on your page to open the Object Edit toolbox.

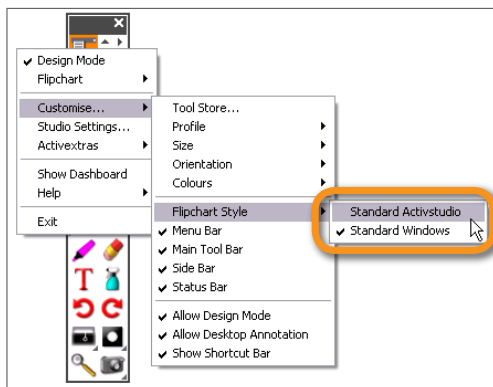

Fraction Creator tools

Options are now available so your fractions can be made up of numbers and/or letters.

CUSTOMISE THE SOFTWARE

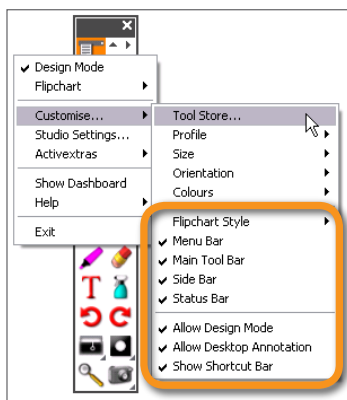

The ability to customise Activstudio has always been one of its greatest strengths. Teachers now have even more options to set up the software exactly as they want it. Use a Windows-style version of the software or the teacher-focussed Activstudio style.

Standard Activstudio

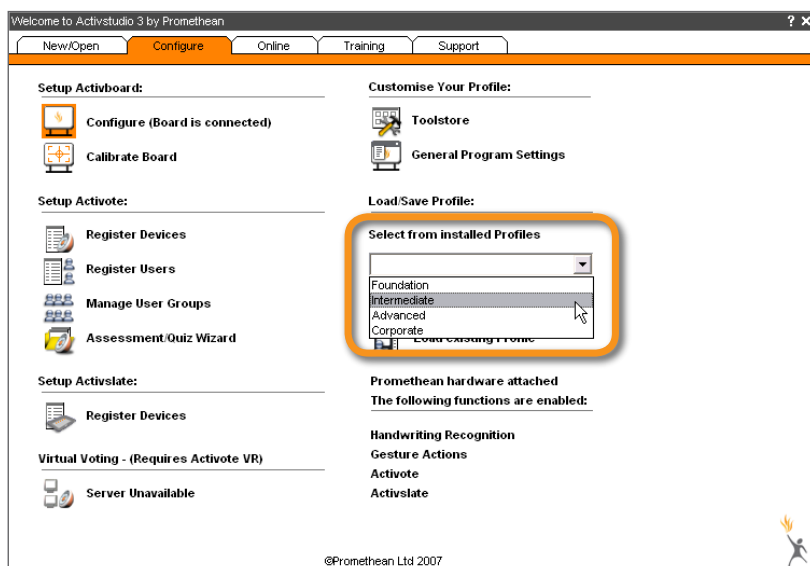

Standard Windows

Now you have the option to choose which toolboxes you want to see.

PROFILES

If you want to see more tools – or less tools! - as you teach, try experimenting with the profiles in the dashboard. Start with the basic profile and as you become more confident with the software, change your profile here. You can also create your own profiles, so the tools you see are tailored to your lessons. These profiles can be saved to use again, or shared with colleagues.

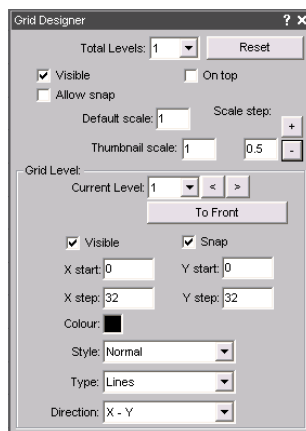

OTHER NEW FEATURES

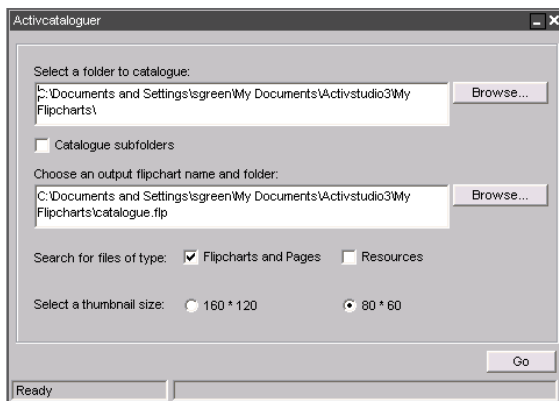

The Grid Designer

The Grid Designer, available in the Tool Store, lets you design the exact type of grid you want.

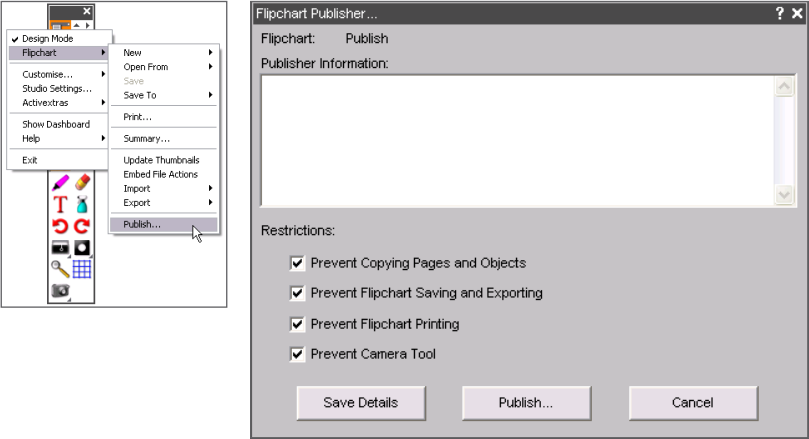

The Activcataloguer

The Activcataloguer is for anyone who wants to create a set of thumbnails of their flipcharts.

Publish flipcharts

The Publish feature limits other people’s ability to copy your work.

FIND OUT MORE

Access more ideas on training via the dashboard or alternatively log on to www.prometheanlearning.com

You can also access Promethean Planet via the dashboard or alternatively log on to www.prometheanplanet.com. Visit this website for news, tips, resources and user forums.
